

Accessory Machine-

Mold testing machine

Application

- During the Die & Mold assembly process
- Pre-delivery
- Mold & Die hydraulic system testing
- Mold & Die ejector pin testing.
- Water cooling system leakage testing

WHY Mold testing machine?

- Improving mold quality
- Indispensable assistant for Mold& Die manufacturer
- Increase productivity
- All the parameters can be set on the Siemens PLC, Such as pressure, timing, speed and flux.

Quick water pressure testing

Quick Hydraulic pressure testing

Oil temperature cooling system

Servo system

Model	Unit	TMG-S
Power	kW	13.75
Hydraulic Circuits for Core Tests	set	6+2
Connect Type		3HP/3HS
Pressure of Hydraulic System	MPa	14
Pressure of Water System	MPa	5.5
Limited Switches	sets	6
Dimension	mm	1600×900×1200
